अभिभावक के लिए गृहकार्य—

◆ आपके बच्चों की देखभाल करने में हमें अच्छा लगा। आपने गौर किया होगा कि उन्हें स्कूल आना बहुत अच्छा लगता है। अगले 1 महीने उनके प्राकृतिक संरक्षक यानी आप उनके साथ छुट्टियां बिताएंगे। हम आपको कुछ टिप्स दे रहे हैं जिससे ये समय उनके लिए उपयोगी और खुशनुमा साबित हो।

◆- अपने बच्चों के साथ कम से कम दो बार खाना जरूर खाएं। उन्हें किसानों के महत्व और उनके कठिन परिश्रम के बारे में बताएं। और उन्हें बताएं कि अपना खाना बेकार न करें।

◆- खाने के बाद उन्हें अपनी प्लेटें खुद धोने दें। इस तरह के कामों से बच्चे मेहनत की कीमत समझेंगे।

◆- उन्हें अपने साथ खाना बनाने में मदद करने दें। उन्हें उनके लिए सब्जी या फिर सलाद बनाने दें।

◆- तीन पड़ोसियों के घर जाएं. उनके बारे में और जानें और घनिष्ठता बढ़ाएं।

◆- दादा-दादी/ नाना-नानी के घर जाएं और उन्हें बच्चों के साथ घुलने मिलने दें। उनका प्यार और भावनात्मक सहारा आपके बच्चों के लिए बहुत आवश्यक है। उनके साथ फ़ोटो लेवें।

◆- उन्हें अपने काम करने की जगह पर लेकर जाएं जिससे वो समझ सकें कि आप परिवार के लिए कितनी मेहनत करते हैं।

◆- किसी भी स्थानीय त्योहार या स्थानीय बाजार को मिस न करें।

◆- अपने बच्चों को किचन गार्डन बनाने के लिए बीज बोने के लिए प्रेरित करें। पेड़ पौधों के बारे में जानकारी होना भी आपके बच्चे के विकास के लिए जरूरी है।

◆- अपने बचपन और अपने परिवार के इतिहास के बारे में बच्चों को बताएं।

◆- उन्हें कुछ लोक गीत सुनाएं।

◆- अपने बच्चों के लिए रंग बिरंगी तस्वीरों वाली कुछ कहानी की किताबें लेकर आएं।

And then there was no stopping them. I was the officer. I should have stopped them there and then, I suppose, but the truth is that it never even occurred to me I should. All along their line and ours I could see men walking slowly towards one another, grey coats, khaki coats meeting in the middle. And I was one of them. I was part of this. I folded the letter again and slipped it carefully back into its envelope. I kept awake all night. By morning I knew what I had to do. I drove into Bridport, just a few miles away. I asked a boy walking his dog where Copper Beeches was. House number 12 turned out to be nothing but a burned-out shell, the roof gaping, the windows boarded-up. I knocked at the house next door and asked if anyone knew the whereabouts of a Mrs Macpherson. Oh yes, said the old man in his slippers, he knew her well. A lovely old lady, he told me, a bit muddle-headed, but at her age she was entitled to be, wasn't she? A hundred and one years old. She had been in the house when it caught fire. No one really knew how the fire had started, but it could well have been candles. She used candles rather than electricity, because she always thought electricity was too expensive. The fireman had got her out just in time. She was in a nursing home now, he told me, Burlington House, on the Dorchester Road, on the other side of town.

Day- 9

1.Read the passage given below and answer the questions that follow:

  Uranium is a metal with valuable properties .it provided mankind with the key that unlocked the tremendous energy of atom.it has natural radiation which can be used in medicine, agriculture, industry and biology. Pure Uranium metal looks like silver or steel. But it is heavier than that. A one -foot cube of uranium weighs over a half a ton. It is the heaviest element found in nature.

Uranium has two very unusual characteristics. It is radioactive. Its atoms break down slowly, releasing energy in form of radiation. Some of its atoms are capable of fission, releasing vast amounts of energy. Uranium's 'fissionability' is the basis of all nuclear power plants and nuclear weapons.

Chemically, uranium is very reactive. When a piece of uranium is exposed to air, it develops a blackish coating, which is a combination of uranium and oxygen in the air. It also forms important compounds with many other elements.

Uranium is widely distributed in small amounts. It is never found in nature in a pure State. Hence, the process of extracting uranium is complicated and take a long time. A single pound of uranium contains as much energy as three million pounds of coal. In nuclear reactors, the shattering uranium atoms produce large quantities of heat. The heat produced thus can be used to turn a turbine, which drives an electric generator.

   a. What are the benefits of uranium for the mankind?
   b. Why is the uranium used for nuclear power plants?
   c. What happens when uranium is exposed to air?
   d. Why is the process of extracting uranium complicated?

   • Air Pollution is a Source of Environmental Destruction.

- Water Pollution and Deforestation Degrade the Earth.
- The Earth must be Saved for our Own Survival.

Day- 10

1.Read the following passage and answer the questions that follow:

    I was the kid who sat on the side-lines and watched others having a good time splashing about in the sea, wishing I could swim. Eventually, I learned how to, the hard way. My brothers threw me into the water. As I floundered and nearly drowned, it didn't occur to me then that my brothers had taught me two important skills: survival and independence. These skills were gifts that I relied on numerous times over as an adult. As a child, I was game for anything. Nothing fascinated me more than the chance to try something new. If nothing else, my curiosity was fuelled by the desire to test my limits. I was sixteen when I climbed my first mountain. It was Gunung Ledang in Johor, Malaysia, in 1980. It was a horrible experience. I found the heat and thickness of the jungle overwhelming. The night spent on the summit was cold and lonely. As I lay in my tent, with my knees curled to my chin, I vowed that I would never climb another mountain.

And yet, ironically, I was one of the two climbers from the first Singapore Mount Everest Expedition who summitted Mount Everest in May 1998.

a. Why did the writer consider his childhood average?

b. Why did the writer say that 'the ability to swim comes almost naturally to any kid growing up in Port Dickson?

c. When did the writer learn to appreciate the skills his brothers taught him that day at the sea?

d. What made the writer vow never to climb again after his Gunung Ledang trip?

1- निम्नलिखित गद्यांशों को ध्यानपूर्वक पढ़िए और पूछे गए प्रश्नों के उत्तर गद्यांश के आधार पर लिखिए-

कविवर रवींद्रनाथ टैगोर को नोबल पुरस्कार मिला। देश-विदेश से बधाई के संदेश आए। उनके पड़ोसी ने उन्हें बधाई नहीं दी। टैगोर, को यह व्यवहार अखरा, लेकिन उन्होंने उसे भुलाने की कोशिश की, पर भुला नहीं पाए। बार-बार उनके सामने उसका चेहरा आ जाता था। वह जब-जब उसके बारे में सोचते क्रोध से भर जाते। अगली सुबह वह समुद्र के किनारे टहल रहे थे। सूर्य की किरणों में सागर चाँदी-सा चमक रहा था। तभी उनकी नज़र करीब ही पानी से भरे गड्ढे पर पडी। वहाँ भी सूर्य की किरणें बराबर पड़ रही थीं। तभी उनको ख्याल आया कि सूर्य ने तो सब पर बराबर किरणें फैलाई हैं।उसने तो समुद्र और गड्ढे में कोई अंतर नहीं किया। टैगोर को अपनी गलती का अहसास हुआ कि यदि दूसरा अपनी उदारता छोड़ रहा है तो वे क्यों छोड़ें? तत्काल उन्होंने उसके घर जाकर उनके चरण-स्पर्श किए। उसकी आँखें गीली हो गईं। वह बोला कि आप जैसे देवतुल्य को यह पुरस्कार मिलना ही चाहिए था। यह कहकर उसने टैगोर के चरण-स्पर्श किए। दोनों के बीच की दूरी मिट गई।

(क) रवींद्रनाथ को पड़ोसी का व्यवहार क्यों अखरा?
